

VILLAGE OF SHOREWOOD HILLS Neighborhood Planning Process

Public Input Sessions

The development of a Neighborhood Plan will allow the Village to judge proposals for new development within the context of the neighborhood, rather than on a case-by-case basis. As part of this process, the Village along with Vierbicher Associates invites you to participate in a Public Workshop to review and provide input on the recommendations that have been drafted for the future of the neighborhood. These recommendations address land use, transportation, height and density, and urban design.
